Summary

Full-Stack Web Developer with hands-on experience building AI-powered web applications, supported by full-stack development training in Java, Python, OOP, DSA, SQL, HTML, CSS, JavaScript, and backend development. Skilled in developing web applications using relational databases, applying problem-solving skills, and following Git/GitHub-based development workflows. Holds a patent in AI-based identity verification and a Salesforce global certification. Passionate about software development, continuous learning, and staying updated with emerging technologies.

Skills

Languages: Java, Python, JavaScript, SQL

Backend & Frontend: Django, Flask, MySQL, HTML, CSS, React.js

Core Concepts: Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA)

Tools: Git, GitHub, Salesforce, Firebase, Generative AI Tools

Soft Skills: Communication, Leadership, Teamwork, Problem-solving.

Education

KKR & KSR Institute of Technology and Sciences — Oct 2022 – Apr 2026
B.Tech in Computer Science and Artificial Intelligence — CGPA: 7.86 / 10 — *Vinjanampadu, AP*

Narayana Junior College — Jan 2021 – Apr 2022
Intermediate in Maths, Physics and Chemistry— Marks: 672 / 1000 — *Guntur, AP*

Oxford Public School — Oct 2019 – Apr 2020
Secondary School Education — Marks: 600 / 600 — *Guntur, AP*

Internships

Full Stack Developer Intern
Tap Academy

- Full Stack Development training covering Java, OOP, DSA, SQL, HTML, CSS, JavaScript and backend development.
- Developed and practiced full-stack web applications using Java-based technologies and relational databases.
- Strengthened problem-solving skills through regular coding, DSA, aptitude, and technical assessments.
- Worked on hands-on projects following Git/GitHub-based development workflows.

Projects

RAGbot — Chat with Documents | *Flask, Python, Groq API (LLaMA 3), HTML, CSS, JS* | GitHub

- Full-stack RAG chatbot supporting PDF, DOCX, TXT, and Markdown uploads with source-cited, context-grounded responses via LLaMA 3 (Groq API).
- Custom chunking pipeline with keyword-based retrieval to surface top-4 relevant passages as LLM context.
- Developed a responsive and user-friendly web interface using Flask, HTML, and CSS, enabling seamless document uploads and real-time conversational interactions with AI.
- Optimized document retrieval and response generation workflows to improve answer relevance, reduce processing time, and enhance the overall user experience for document-based question answering.

Academia Share | *Django, Python, Mysql, Git, HTML, CSS, JS, React.js* | GitHub Link

- Role-based campus file-sharing platform with teacher/student dashboards supporting upload, deletion and permissions.
- Keyword search functionality for quick discovery of shared academic resources across the platform.
- Designed and implemented a secure authentication and authorization system using role-based access control, ensuring appropriate access to academic resources for teachers and students.
- Developed a MySQL-backed database architecture to efficiently manage user accounts, file metadata, and resource-sharing activities, improving data organization and retrieval performance.

Achievements

- Secured a patent on an AI-Based System for Verifying & Securing Digital Communication Profiles using Multi-Factor Biometrics
- Competed in national and regional hackathons – Smart India Hackathon, MSME, T-Hub
- Participated in the Jeevan Kaushal English Speaking Club as a Coordinator
- Published research paper on Secure Identity Verification using True-Profile Detection – IJSDR

Certifications

- Salesforce Certified Agentforce Specialist -Salesforce
- AI Fundamentals – IBM
- Full Stack Web Developer – Blackbugs
